

Upload Image To IBM Container

Task	TSK-275369
Team ID	PNT2022TMID44588
Student Name	Priyadharshini.S
Student Roll No	731719205016

CREATING REPOSITORY IN IBM CLOUD:

Create repository

1. Tag an image to point to this registry. Choose a local image, target namespace, and target repository.

```
docker tag <local_image> icr.io/<my_namespace>/<my_repo>
```

2. Push the tagged image.

```
docker push icr.io/<my_namespace>/<my_repo>
```

UPLOAD IMAGE TO IBM CONTAINER REGISTRY:

The screenshot shows the IBM Cloud Container Registry interface. On the left is a sidebar with navigation links: Container Registry, Quick start, Namespaces (1), Repositories (1), Images (1), Trash (0), and Settings. The main area is titled 'Repositories' and shows a 'Global' location filter. A table lists the repositories, with one entry 'ibmproj' in the 'myproj' namespace, containing 1 image and updated 4 days ago. A 'Create' button is visible in the top right of the table area.
